

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A catalyst for polymerizing  $\alpha$ -olefin, comprising a combination of: a component (A) that is a solid catalyst component comprising magnesium, titanium, and a halogen as an essential component; a component (B) that is an organoaluminum compound; ~~and~~ a component (C) that is a compound comprising a C(=O)N bond and is selected from compounds represented by the following general formula (1) or (2):

(1)

(2)

wherein R<sup>1</sup> to R<sup>7</sup> each represent an aliphatic hydrocarbon group having 1 to 20 carbon atoms, an alicyclic hydrocarbon group having 1 to 20 carbon atoms, an aromatic hydrocarbon group having 6 to 20 carbon atoms, or a hetero atom-containing hydrocarbon group, and the arbitrary groups of R<sup>1</sup> to R<sup>3</sup> and the arbitrary groups of R<sup>4</sup> to R<sup>7</sup> may be combined to form a ring structure; ~~and a component (D) that is a silicon compound, or a compound having at least two ether bonds.~~

Claims 2 and 3 (Canceled).

Claim 4 (Previously Presented): The catalyst for polymerizing  $\alpha$ -olefin as claimed in Claim 1, wherein component (A) is obtained by bringing a component (A1) and a component (A2) in contact with each other, wherein

component (A1) is a solid component comprising titanium, magnesium, and a halogen as an essential component; and

component (A2) is a silicon compound represented by the following formula:

wherein  $R^8$  represents an aliphatic hydrocarbon group, an alicyclic hydrocarbon group, or a hetero atom-containing hydrocarbon group;  $R^9$  represents an aliphatic hydrocarbon group, an alicyclic hydrocarbon group, a hetero atom-containing hydrocarbon group, a halogen, or hydrogen;  $R^{10}$  represents a hydrocarbon group; and  $m$  is  $1 \leq m \leq 3$ .

**Claim 5 (Previously Presented):** The catalyst for polymerizing  $\alpha$ -olefin as claimed in Claim 4, wherein component (A) is obtained by further bringing components (A1) and (A2) in contact with:

component (A3), an organoaluminum compound.

**Claim 6 (Previously Presented):** The catalyst for polymerizing  $\alpha$ -olefin as claimed in Claim 1, wherein component (A) further comprises a component (E), an electron donor.

**Claim 7 (Previously Presented):** The catalyst for polymerizing  $\alpha$ -olefin as claimed in Claim 4, wherein component (A1) further comprises a component (E), an electron donor.

**Claim 8 (Currently Amended):** The catalyst for polymerizing  $\alpha$ -olefin as claimed in Claim [[3]] 1, wherein component (D) is a silicon compound represented by the following formula:

wherein R<sup>8</sup> represents an aliphatic hydrocarbon group, an alicyclic hydrocarbon group, or a hetero atom-containing hydrocarbon group; R<sup>9</sup> represents an aliphatic hydrocarbon group, an alicyclic hydrocarbon group, a hetero atom-containing hydrocarbon group, a halogen, or hydrogen; R<sup>10</sup> represents a hydrocarbon group; and m is 1 ≤ m ≤ 3.

Claim 9 (Currently Amended): The catalyst for polymerizing α-olefin as claimed in Claim [[3]] 1, wherein component (D) is an aliphatic diether or an aromatic diether.

Claim 10 (Previously Presented): The catalyst for polymerizing α-olefin as claimed in Claim 6, wherein component (E) is a phthalic acid diester compound, a cellosolve acetate ester compound, a phthalic acid dihalide compound, a succinic acid diester compound, or an aliphatic or an aromatic diether compound.

Claim 11 (Previously Presented): A production method for an α-olefin polymer, comprising homopolymerizing or copolymerizing an α-olefin by contacting the α-olefin under homopolymerizing or copolymerizing conditions with the catalyst of Claim 1.

Claim 12 (Previously Presented): The catalyst for polymerizing α-olefin as claimed in Claim 1, wherein the compound comprising a C(=O)N bond is a member selected from the group consisting of tetramethylurea, tetraethylurea, bis(tetramethylene)urea, N,N'dimethyl-N,N'-diphenylurea, 1,3-dimethyl-2-imidazolidinone, 1,3-dimethyl-3,4,5,6-tetrahydro-2(1H)-pyrimidinone, N,N-dimethylpropionamide, 1,3-diacetyl-2-imidazolidinone, 1-methyl-2-pyrrolidinone, 1-ethyl-2-pyrrolidinone, 1-dodecyl-2-pyrrolidinone, 1-cyclohexyl-2-pyrrolidinone, 1-phenyl-2-pyrrolidinone, and N-methyl-ε-caprolactam.

**Claim 13 (Previously Presented):** The catalyst for polymerizing  $\alpha$ -olefin as claimed in Claim 1, wherein in formula (1), the arbitrary groups of R<sup>1</sup> to R<sup>3</sup> are combined to form a ring structure.

**Claim 14 (Previously Presented):** The catalyst for polymerizing  $\alpha$ -olefin as claimed in Claim 1, wherein in formula (2), the arbitrary groups of R<sup>4</sup> to R<sup>7</sup> are combined to form a ring structure.
